ARTIGENSELLSCHAFT

VOLVO
VOLVO GROUP

VOLVO
Volvo Car Corporation

Partners:

HONDA

TOYOTA

Disclaimer

Our collaboration/work is based on compliance with competition law. The Drive Sustainability strategy represents the common ambition of the partnership. The individual OEMs may have their own strategies or may be in the process of defining one. This represents the partnership's long-term vision and is not limited to a specific time frame. The strategy action plan specifies the intended time frame for each activity. We will periodically review our strategy and planned activities to make sure they contribute to achieving our ambitions, are in line with international and national targets and meet stakeholder expectations. The activities will be adjusted if deemed necessary by our partners. Our ambition Carbon Neutrality means that we aim at zero emissions, but may take currently available measures to achieve net zero emission, while contributing to the research and development of new solutions. On our website you can find more information about the strategy ambitions, our principles, and how we define the underlying concepts.
